So I recently went to a phenomenal talk by Diana Cooper who has written multiple books about the Golden Age and ascension and working with your angels. And I found some channeling around the Golden Age which Diana Cooper has been teaching us about for many years.
I just wanted to record today what my guides had told me about the Golden Age which they call the Age of Love and where we were up to at this moment in time.
So I asked them, **Are we in the Age of Love, the Golden Age right now?**
They said "Not yet the pace is dictated by the levels of collective consciousness".
I said **How we doing?** and they said that "Much progress has allowed for earth to start moving into and towards the Age of Love and this will continue gathering momentum until it reaches the pinnacle of the love vibration from the collective."
I said **In earthly measurements of time are we on track for 2032, which was the date given for the Golden Age?**
They said "Depending on collective consciousness, we will reach the Golden Age by 2032. 2032 is divinely decreed. However, there is no reason

why the vibration synonymous with the Golden Age cannot be reached collectively and individually before 2032."
I said **How will the world look or change as we now go towards this divinely decreed event?**
They said, "The world as we know it is going to change from the inside out. The fabric of everything we currently know and understand is going to change on a quantum level. All matter will evolve as thoughts and consciousness evolve and as hearts open."
I said **How would this look in practical everyday terms?**
They said, "On a practical day-to-day level, it will become more harmonious, more community orientated and more love thy neighbor. People will pull their skill sets and work towards the good of humanity."
They said "People will be more in their essence, more loving, and more trusting. They will be less stressed as their lives, move more into to being, rather than striving. Cities will turn into communities as corporate trade diminishes. Old offices will be turned into homes and city areas will be free of the burdens of commuters or trade and so they will be cleaner with more open spaces and clean air. Healing technology in the way of healing towers which emit healing frequencies will be pulsed around the perimeter of all big cities and capitals. They will become healing centers, healing cities. More green spaces will be made and less traffic will provide more pedestrianized streets lined with trees and wildlife."
They said that, "Transportation is unlikely to need roads in the future and faster trains elevated above the cities will propel people magnetically and at speed creating free and clean transport. Driverless and flying cars working on magnetic energetic grids of light will take people easily to any location. Transport underground which harms the earth's natural magnetic pulsations will be removed."
"Gigantic crystals will be used around cities to send frequencies of light and healing. The crystals will be naturally cleansed by the elements of nature. Sound frequencies will be the new medicine for illness created by imbalances. Illness in the Golden Age will be minimized as healing frequencies become the norm in all buildings, transport or areas of recreation."
"Buildings used for nefarious purposes will be demolished or renovated, cleansed and blasted with healing light," and the examples they gave where

this may happen are the Houses of Parliament and Buckingham Palace.
“Crystal technology and sound frequencies will run all new homes in the future. Harmful emissions from transport, EMFs and corporations will be completely halted. Business that is not heart-centered with the mission of ‘how may I serve’ will not go forward. More activities will be held outside as the weather around the world becomes steady, warmer and predictably seasonal. Resources will no longer be mined from mother earth. Drilling, fracking and mining will be halted.”
“Animals will be free to wander and no longer kept in zoos as people's hearts open and they hear animals needs more clearly. Animals will have the ability to teach every human regardless of age, creed or culture. Animals will be revered, even insects. As habitats are restored naturally, then even animals previously labeled as annoying like flies and foxes will move into their own natural vibrational space. As the nature of business and trade changes so will the needs of people to work long hours. Time will now be dedicated to recreation, having fun, community and relaxation. People in their relaxed state will emanate great swathes of light nurturing everyone that they meet.”
“Food will be plentiful, organic and locally grown. People will exchange their home-grown produce within their local communities. There will be joy, happiness and peace in the Golden Age. Leaders will not be necessary as people start to lead and cooperate from the grassroots levels. Laws will change to allow for local communities to work within the constructs of common law.”
So if you'd like to learn more about the Golden Age then I suggest you go and look up the work of Diana Cooper who has been teaching me directly and indirectly for very for many years. And you can find lots of information around angels, the Golden Age, Atlantis, and many other subjects just by looking up Diana Cooper. I hope you have a lovely day and I'll see you all very soon. Bye for now.
